

Trimble Correction Services for Mapping & GIS

ENABLING HIGHER ACCURACY FOR YOUR APPLICATION NEEDS

	VRS Now™	CenterPoint® RTX		FieldPoint RTX™		RangePoint® RTX	ViewPoint RTX™	
BENEFITS	Instant access to real-time kinematic (RTK) corrections; no base station required	Centimeter-level GNSS accuracy		Mid-level accuracy GNSS corrections		Achieve higher accuracy with greater availability than SBAS corrections	Affordable, entry level GNSS corrections for single frequency receivers	
		Ideal for working in remote locations across large geographic areas. No local base station or VRS network required. Available worldwide.						
DELIVERY								
HORIZONTAL ACCURACY	< 2 cm	< 2 cm		10 cm		30 cm	< 50 cm	
APPLICATIONS	Topographic and cadastral mapping			Collect markers, tracks and photos in the field				
	Asset management for utilities infrastructure, environmental management, road works and more							
COMPATIBLE DEVICES	CMRx, CMR+, RTCM v2.3, RTCM v3.1 or RTCM v3.2 MSM via NTRIP	Trimble Geo7X handheld (IP only), Trimble R2, Spectra Precision SP60					Trimble Geo7X handheld (IP only), Trimble R1, Trimble R2, Spectra Precision SP60, Trimble EM100	
CONVERGENCE TIME	Instant	< 1 min (In select regions)	< 15 min	< 1 min (In select regions)	< 15 min	< 5 min	< 5 min

For more information: trimble.com/positioning-services or contact Correction Services Customer Care **To order:** contact your local reseller or visit tpsstore.trimble.com
Free 30-Day Trimble RTX Trial: contact your local Customer Care team and mention the **Geospatial 30-day trial:** trimble.com/Positioning-Services/contact-us
 30-day trial must be activated by December 31, 2019.

RMS performance based on repeatable in field measurements. Achievable accuracy and initialization time may vary based on type and capability of receiver and antenna, user's geographic location and atmospheric activity, scintillation levels, GNSS constellation health and availability and level of multipath including obstructions such as large trees and buildings.
